Review Questions

1. What is the primary function of a hypervisor in virtualization?

- ☐ To manage cloud storage
- ☐ To create virtual machines
- ☐ To provide network security
- ☐ To develop web applications

2. Which of the following is a key component of cloud datacenter architecture?

- ☐ Service Oriented Architecture
- ☐ Hypervisors
- ☐ Storage Area Network
- ☐ Web APIs

3. What does the term 'identity privacy' refer to in the context of virtualization?

- ☐ Network security protocols
- ☐ Protection of user data
- ☐ Access control policies
- ☐ Management of virtual machines

4. Which of the following is NOT a type of cloud service?

- ☐ Hardware as a Service (HaaS)
- ☐ Infrastructure as a Service (IaaS)
- ☐ Platform as a Service (PaaS)
- ☐ Software as a Service (SaaS)

5. What is a primary concern regarding security in virtualization?

- ☐ Performance of applications
- ☐ Cost of hardware
- ☐ User interface design
- ☐ Isolation of virtual machines

6. Which component is essential for accessing cloud services?

- ☐ Local storage
- ☐ Desktop applications
- ☐ Physical servers
- ☐ Web browsers

7. What does 'collaboration within the cloud' typically involve?

- ☐ Managing local networks
- ☐ Creating physical data centers
- ☐ Developing standalone applications
- ☐ Sharing resources and data

8. What is a characteristic of a software-defined datacenter?

- ☐ Automated resource allocation
- ☐ Physical hardware management
- ☐ Limited scalability
- ☐ Manual configuration of services

9. Which of the following best describes cloud federation?

- ☐ Creation of a single cloud provider
- ☐ Integration of multiple cloud services
- ☐ Development of local data centers
- ☐ Isolation of cloud resources

10. What is the role of web APIs in cloud computing?

- ☐ To store data securely
- ☐ To enable communication between applications
- ☐ To provide user interfaces
- ☐ To manage hardware resources

11. Which of the following is a driving force behind cloud computing?

- ☐ Limited software options
- ☐ Increased hardware costs
- ☐ Demand for scalability
- ☐ Decreased internet usage

12. What is the purpose of a Storage Area Network (SAN)?

- ☐ To enhance application performance
- ☐ To facilitate data storage and retrieval
- ☐ To manage virtual machines
- ☐ To provide high-speed internet

13. Which of the following is a benefit of using cloud storage?

- ☐ Accessibility from anywhere
- ☐ Limited data sharing
- ☐ Increased physical space
- ☐ Higher maintenance costs

14. What does the term 'presence' refer to in cloud services?

- ☐ User availability and status
- ☐ Data storage capacity
- ☐ Network speed
- ☐ Application performance

15. Which of the following is a key feature of Service Oriented Architecture (SOA)?

- ☐ Static resource allocation
- ☐ Loose coupling of services
- ☐ Single vendor dependency
- ☐ Monolithic applications

16. What is a common method for accessing cloud services?

- ☐ Local software installation
- ☐ Direct server connection
- ☐ Web applications
- ☐ Physical media transfer

17. What is a primary advantage of using virtualization?

- ☐ Increased hardware costs
- ☐ Complex management
- ☐ Reduced energy consumption
- ☐ Limited resource allocation

18. Which of the following describes a hypervisor?

- ☐ A network security tool
- ☐ A physical server
- ☐ A software layer for managing virtual machines
- ☐ A type of cloud service

19. What is a potential security problem in virtualization?

- ☐ Simplified management
- ☐ Increased performance
- ☐ Enhanced user experience
- ☐ Data leakage between virtual machines

20. Which of the following is NOT a component of cloud infrastructure?

- ☐ Computing resources
- ☐ Storage
- ☐ Networking
- ☐ Web browsers

21. What is the main purpose of web applications in the cloud?

- ☐ To enhance local storage
- ☐ To enable online services
- ☐ To provide offline access
- ☐ To manage hardware resources

22. What does the term 'accessing the cloud' imply?

- ☐ Storing data on physical devices
- ☐ Connecting to cloud services via the internet
- ☐ Developing applications locally
- ☐ Using local servers

23. Which of the following is a characteristic of a cloud datacenter?

- ☐ Physical location is fixed
- ☐ Manual resource management
- ☐ Scalability and flexibility
- ☐ Limited access to resources

25. Which of the following best describes the concept of 'presence' in cloud services?

- ☐ User engagement metrics
- ☐ Real-time user status and availability
- ☐ Data storage capacity
- ☐ Network performance

26. What is the primary focus of security in cloud computing?

- ☐ Hardware management
- ☐ Cost reduction
- ☐ Data protection and privacy
- ☐ User interface design

27. Which of the following is a key aspect of developing applications for the cloud?

- ☐ Scalability and flexibility
- ☐ Local storage optimization
- ☐ Static resource allocation
- ☐ Limited user access

28. What is the role of clients in accessing cloud services?

- ☐ To provide user interfaces
- ☐ To connect to cloud resources
- ☐ To develop applications
- ☐ To manage physical servers

29. What does the term 'service-oriented architecture' emphasize?

- ☐ Integration of hardware components
- ☐ Development of monolithic applications
- ☐ Loose coupling and reusability of services
- ☐ Static resource allocation

30. Which of the following is a benefit of cloud federation?

- ☐ Isolation of services
- ☐ Enhanced collaboration between clouds
- ☐ Limited resource sharing
- ☐ Increased costs
